Year 2

In this Cypher Coding Club, students will learn the very basics of computer programming through a mixture of online and offline activities. Students will start with the very basics of learning about what algorithms, sequences and loops are, with the opportunity to complete simple code of their own!

Year 3

In this Cypher Coding Club, children will be learning to code through the Scratch platform. Children will be working through incrementally harder content each week, and will be introduced to new programming concepts as they go along. Towards the end of the term, children will design and develop their own Pac-Man style from scratch, meaning they can combine their creativity with their new coding knowledge to create something very exciting!

Background:

Little House of Science is built on the principle of nurturing the natural curiosity and quest for knowledge which kids have about the world around them. The foundation of everything around us is based on the principles of science and we aim to inspire our pupils. Little House of Science is based on teaching Life, Earth, Physical Sciences (covering biology, chemistry, physics, engineering, robotics). Each week we cover a new topic filled with exciting, risk-free experiments and demonstrations. Our teachers who are scientists or teachers with a science background, ensure our pupils enjoy a thrilling, fun environment to nurture their creativity and expand their knowledge. By equipping children with scientific knowledge in a fun way, we believe we are also contributing to the ability to analyse and solve problems. Little House of Science incorporates the national curriculum for KS1 and KS2 plus hundreds of additional topics which are part of STEM to give children a broad understanding of many topics. Our age-adjusted classes are designed for children aged between 3-12 years.
